Polosys POS

P-POS is a powerful Application to manage Van sales and distribution. Its feature-rich and easy to use solution for the sales and distribution business. It is designed to automate and enable mobile and field sales using handheld terminals like smart phones and TABs to improve the sales cycle efficiency and reliability. P-POS eliminates the need for paper-based back office reconciliation and avoid duplicate data entry.

In addition, they need only to sync the desktop application to our app data. These synced items are automatically available in the PPOS App for each Van Sales Man. This also comes along with full fledged Accounting and Inventory Polosys ERP Application.
